

ABOUT US

ZES BIOSCIENCES
PRIVATE LIMITED

**EXPLORE EVERYTHING,
MISS NOTHING**

Plants create bioactive substances called phytochemicals to defend themselves. They come from a variety of foods, including whole grains, fruits, vegetables, nuts, and herbs. To date, over a thousand phytochemicals have been identified. After being extracted from a variety of sources, phytochemicals are used extensively in the creation of nutraceuticals and functional foods. Consuming phytochemicals like carotenoids, polyphenols, isoprenoids, phytosterols, saponins, dietary fibres, polysaccharides, etc. has been linked in recent research to health advantages like preventing diabetes, obesity, cancer, and cardiovascular diseases. Consequently, the use of phytochemicals has become more widespread.

For the main components of the most popular medicinal herbs, ZES Bioscience Pvt. Ltd. provides a comprehensive range of reference materials.

ZES Bioscience Pvt. Ltd. honours nature, cultivates community, and nurtures the world via ethical, eco-friendly techniques by fusing traditional wisdom with contemporary sustainability.

The logo for ZES BIOSCIENCES PRIVATE LIMITED is displayed in white text on a dark green square background. The text is arranged in two lines: "ZES BIOSCIENCES" on the top line and "PRIVATE LIMITED" on the bottom line.
